COMB SAGE TEA IN

If Mixed with Sulphur it Darkens so Naturally Nobody can Tell.

Grandmother kept her hair beautifully darkened, glossy and attractive with a brew of Sage Ten and Sulphur. Whenever her hair took on that dull, faded or strenked appearance, this simple mixture was applied with wonderful effect. By asking at any drug store for "Wyeth's Sage and Sulphur Compound," you will get a large bottle of this old-time recipe, improved by the addition of other ingredients, all ready to use, at very little cost. This simple mixture can be depended upon to restore natural color and beauty to the hair.

A well-known downtown druggist says everybody uses Wyeth's Sage and Sulphur Compound new because it darkens so naturally and evenly that nobody can tell it has been appliedit's so easy to use, too. You simply dampen a comb or soft brush and draw it through your hair, tak! b: one strand at a time. By morning the gray hair disappears; after another application or two, it is restored to its natural color and looks glossy, soft and beautiful .- Adv.

JELLY AND JAM.

"Hello, Jelly," said the jam in one of the Jam pots on the shelf.

"Hello, Jam," said the jelly in one of the Jelly glasses on the same shelf. "Well, we had quite a good deal of fun last year," said the jam.

"We had some fine adventures for felly and jam. And the wheatless things and the vegetables which had been dried-they had good times, too. They made nice traveling companions, I thought, didn't you think so?" asked

"They were fine," said the lam, "I think they were as nice as could be. They weren't snobbish or silly. They behaved well and like nice, dignified vegetables and other kinds of food should behave." "I agree with you," said the jelly.

"Of course we're expected to be sweet, so it's not surprising that we were nice traveling companions, but I admired the rest very much."

"Prny tell us what you are talking about?" asked one of the other jelly

And the other jam pots said: "Yes. pray tell us. We do not know at all what you are talking about and it sounds very interesting." "You do the talking," said the jam.

"Oh, no, you are the best speaker possible," said the jelly modestly. "I don't know that I agree," said the jam sweetly. "but still if you want me to talk I will."

"Do talk," said the rest.

"It was this way," said the jam. And all the jelly glasses and the jam pots paid a great deal of attention and listened carefully when the jam told the story.

"Last summer." jam, "we 'v. 'e two of many jelly glasses and jam pots which went on a trip in a train through the country.

"We were samples of how jelly and jam could be made using the things which should be used and saving the things which should be saved.

"We were not the only things either, for as I have said before, there were the vegetables which had been dried and preserved for the winter and which had been fixed in the modern, saving way.

"We had real people with us. They had the train stop at different towns; oh, how many, many towns we did see. We had a most wonderful trip.

"These people talked to the people of each town and the people of each town looked at us and were told just how we were made,

"They were shown how they could put up jelly and Jam and vegetables so they would save the things which should be saved, and so they could use the things which could be used to make us taste so very fine.

"They all said how good we looked. And the crowds that came to see us in every place made us feel very proud and happy.

"Soon we are to be enten, but it is a joy to think that we showed people such splendid things about saving. Of course we didn't do the work our-

Becoming Known.

Fertile Soil on Which Can Be Produced Record Crops Offered to Settlers at Prices Attractive to Farm Seekers.

In the early months of 1919 there was a demand for farm lands in Western Canada, the greatest that has ever been in the history of the country This despite the fact that farm hads have increased in price, as the value of the form product has increased and the virility and productive value of Western Canada farm lands have come more and more into evidence. Farm ing there is no longer an experiment. Good crops can be grown in all localitles, some probably a little more favorable than others, but on the whole n good-more than good-general average. Land elsewhere on the continent is used for the developing of one hundred and twenty dollar steers, thirty-five dollar logs, two dollar and twenty cent wheat and eighty-five cent onts, and its price is anywhere from one hundred and fifty to three hundred dollars an acre. Western Canada land sells at from twenty to forty dollars an acre, and the farmer cultivating it gets one hundred and twenty-five dollars for his steer, thirtyfive dollars for his hog, two dollars and twenty cents for his wheat, and eighty-five cents for his outs. And he can grow corn, too, but Western Canada is saying no more about it than North Dakota did fifteen years ago, when it was an experiment there, and see what North Dakota is doing today. The prediction is that in less than a decade corn will be grown successfully in all parts of Western Cannda. It is, therefore, easy to account for the increased demand for Western Canada lands. The war is ended. and the food that the American and Canadian farmer sent across to the soldier, holding up his strength and maintaining his vitality, won the war, No! It was just a factor in winning ft, as was the soldier of Italy, of France, of Belgium, of Great Britain. of Canada and of the United States. An important factor, nevertheless, People generally have begun to realbe what food means, means to everybody-and it is grown on the farm. So people today want farm lands, and they want those that are good. The great, wide, open stretches of wonderfully productive soil of Western Cannds are the chief attraction of the land seekers of today, and it will be so tomorrow, and of all days, until these vacant inviting acres are brought into fruition by the hand of man and the multiplied effort of steam and gusoline power, to the influence and on-

The pulse of today's desire to secure farm lands may be seen to bent in the ectumns of the local newspaper, recording sales of many tracts of lands. ranging from 160 to 1,200 acres, A Regina (Sask.) paper says, "In farm lands there is so brisk a business he-Ing done that I might be considered a boom." Another paper reports the sale of a section of raw prairie seven miles east of Regina for 835 an acre. and 200 neres at \$50 an acre. One real-estate firm handled in three weeks' time over 3,500 acres of farm lands, the turnover being upward of \$100,000. An improved form near Regena changed hands at \$17 an acre. "For the first time in the history of the Moose how district farm land has Leen sold for \$100 an acre, when J. S. Cameron of Victoria, B. C., sold balf a section, known as the Lett farm, to John Logan. The farm was bought a year ago for \$85 an acre and is located three miles from the city. It is highly improved and has one build-

eration of which these lands present

such a splendid opportunity.

"The movement of farm hands is opening up well this senson and there is every indication that a large area of prairie property will be turned over during the months intervening before sarcellitue:

"The price received for farm lands in each instance is considered as good, particularly for unimproved raw praisele, and shows a considerable improves ment on prices for similar properties sold during the years of the war."-

GREEN FEEDS FOR POULTRY

There Is Much in Proper Curing and Handling-Beets and Mangel-Wurzels Also Good.

If you have fed clover or alfalfa to poultry in its green state or dry you know its value. If you have not used it as a hen feed do so this winter, even if you have to buy some, and in future seasons you will lay in a good supply. There is much in curing and handling this food to have it right for hens. If it has been done properly, cut into one-quarter-inchlengths, and place it in a tub or barrel, then turn on steam or hot water, which at once brings back the aroma of the harvest field. Next spread out in the mixing box and sift on some cornmeal, middlings and animal meal, salt a little and you have as good a mess for laying hens as can be prepured. In some respects alfalfa is better than clover. It is very rich in protein, yields more in a year than clover, and hens like it better,

For poultry it should never be allowed to become woody. A good field of alfalfa will produce more hen feed than the same amount of space put into any other crop.

Next in order for a dependable winter food come beets and mangel-wurzels. There are different sorts, red. yellow and white. All make a good winter hen feed. They are composed largely of water, but it makes an excellent winter food, being easily grown and kept and is very handy to feed. By feeding plenty of green food to the hens in winter there is a profit derived in two ways. The hens will be more healthy, therefore lay better, and by working it into the daily ration the cost of feeding the flock is lessened considerably,

HINTS ON HANDLING POULTRY

Among Other Things for Farmer to Remember Is That Male Doesn't Influence Number of Eggs.

(Prepared by the United States Depart-

It is urged that all farmers and poultrymen adhere strictly to the following principal rules in handling their poultry and eggs:

1. Keep the nests clean; provide one nest for every four hens. 2. Gather the eggs twice daily.

3. Keep the eggs in a cool, dry room 4. Market the eggs at least twice a

5. Sell, kill or confine all male birds

One Hundreds Hens Should Be on

An extract from a local paper says: so as to produce infertile eggs. The tanle bird has no effect on the number of eggs produced.

MISSION OF OYSTER SHELL

Not Given to Supply Grit, but to Make Bone, Muscle and Feathers -Help Out Ration.

beginners, have the impression that syster shells make a good grit for fewls, but such is not the ease. Oys or shelis, in some respects do help to grind the fowl's rood, but the cuter mission is to make bone, muscle and fenthers. They form the shell of the erg, or needs in this matter and at the same time aid in tooking a complete ration when fowls are fed charcoal and grit together with their grain rations. If you keep them before the hens and do not feed fat-producing feeds, they will prevent soft-shelled eggs and keep them from acquiring the egg-enting habit, which is one of the greatest losses ever experienced by any poultryman. In almost every feed given to fowls we find a shortage of ash. The oyster shells supply this want of ash and the hens lay their full quota of eggs.

AVERAGE YEARLY EGG RECORD

About 130 Per Hen Is Good Estimate -Result From Flock Properly Cared For.

About 130 eggs per hen is a fair average for the yearly egg record. A flock properly cared for should produce about one third as many eggs as there are hens, during the months of December, January and February.

Acid-Stomach Ruins Health of Millions

digestion; that awful bloated, lumpy feeling after eating and downright stomach misery that you who have experienced it know so well; besides disgusting belching, food-repeating, sour stomach and distressing heartburn—besides all this, ACID-STOMACH undermines the health and saps the

strength of millions.

If you don't get rid of those stomach miseries there is no telling where your stomach troubles will end, for it is a well known scientific fact that many serious ailments have their start in an acid-stomach.

Start now-this very day-toget rid of yourstomach miseries. Take EATONIC —the wonderful remedy that absorbs the excess acid from the stomach and brings INSTANT relief. You simply have no idea how much better, stronger and brighter you feel at once. It drives out all the gas and bloat, puts an im-mediatestop to belching and heartburn,

ends stomach suffering and makes is cool, sweet, comfortable and strong. There can be no further excuse for you to allow acid-stomach to wreck your health-pile up misery upon mis-ery until you get to the point where you feel down and out and that life has lost all its joys. Remember, just as acidmouth ruins teeth, so acid-stomach ruins health.

Take EATONIC. It's good, just like a bit of candy and makes the stomach feel fine. You can then eat the things you like and, what is more, every mouthful you eat will count in creating power and energy. You'll feel so much better—have punch and pep—the power and will to do things and get results, and your stomach misery will be gone. Take our advice. Get a big box of EATONIC from your druggist today. It costs so little. If it fails to remove your stomach distress, he will refund your money. That is guaranteed; you are to be satisfied or money refunded. Take EATONIC. It's good, just like
